

Home Work – July 16th 2017

Write the code for the HTML Page that looks like below.

You can use any image that you prefer.

The first column in the table must be Tree Name which contains name of the tree. Tree Description is the link to the description page on the internet for that specific tree. You can use any website and put their link here. The third column must be the image of that tree. Make sure all the images are sized well and should be all same size in the code. The links must open in new page and new window.

Planting 1 Tree at a time

Tree Name	Tree Description	Tree Image
acacia	Check Acacia Description	
aspen	Check Aspen Description	
birch	Check Birch Description
