

Home Work – July 9th 2017

YOUR FIRST HTML PAGE

- Create your own HTML Page and name it “yourfirstname_yourlastname”.html
(for me it will be **ashish_ruhani.html**)
- Format a five-paragraph essay in an html page
- It should have following:
 1. Page Title
 2. Page Header
 3. Introduction paragraph with at least 5 lines and title = “introduction”
 4. Three other paragraphs, each with sub headings and title = “essay”
 5. At least one of the elements in your web page must have title
 6. Conclusion paragraph with title = ”conclusion”

This essay can be as long/short as you like it to be.
