

Computing Your Raw Score

1. Using the Practice Test Answer Keys found on pages 136-141, check your answer sheet against the list of correct answers beginning with the first Quantitative Section.
2. Mark your answer for each test question in the "Your Answer" column. Next, give yourself a **✓** in the "C" column for each correct answer, a **0** for each wrong answer in the "W" column, and a **-** for each question omitted in the "O" column.
3. Add the total number of correct answers and enter the number in the "Total # Correct" box; add the number of **0s** and enter in the "Total # Wrong" box. (It is not necessary to add the number of omits. You can use that information to go back and review those questions and to make sure that you understand all answers.)
4. Raw scores are calculated by using the following system:
 - One point is given for each correct answer.
 - No points are added or subtracted for questions omitted.
 - One-fourth of a point is subtracted from the number of correct answers for each incorrect answer.
 - Scores involving fractions are rounded to the nearest whole number; e.g., if the fraction is less than $\frac{1}{2}$, the number is rounded down; if the fraction is $\frac{1}{2}$ or greater, the number is rounded up.
5. Divide the number of wrong answers in the "Total # Wrong" box by 4 and enter the number in the "# Wrong ÷ 4" box. For example, if you had 32 right and 19 wrong, then your raw score is 32 minus one fourth of 19, which equals $27\frac{1}{4}$ ($32 - 4\frac{3}{4} = 27\frac{1}{4}$). If your answer contains a fraction that is less than $\frac{1}{2}$, round the number down to the nearest whole number; if the fraction is $\frac{1}{2}$ or greater, round up to the nearest whole number.
6. Add the totals of Boxes 3, 6, and 9 and enter the Raw Score for the section in the appropriate box.
7. Using the estimated percentile table on pages 142, determine your estimated SSAT Percentile and enter this information on your worksheet.
8. Repeat this procedure for each simulated test section that you have taken.

Correct Answer	Your Answer	C	W	O
Section 1				
1. A	A	✓		
2. B	C		0	
3. C				-
4. C	C	✓		
5. D	D	✓		

Raw Score:
Add Boxes 3, 6, 9

7. Using the estimated percentile table on pages 142, determine your estimated SSAT Percentile and enter this information on your worksheet.
8. Repeat this procedure for each simulated test section that you have taken.

Answer Key

Upper Level Practice Test II : QUANTITATIVE (Sections I and 4)

For each question, mark **✓** if correct (C), **0** if wrong (W), or **-** if omitted (O).

Interpreting Your Scores — Percentiles

Your official SSAT score report will include a measure of your scores against all students of your gender and grade who have taken the SSAT in the U.S. and Canada for the first time on one of the eight Standard test dates in the past three years (SSAT Percentile).

Because the *Official Guide to the Upper Level SSAT* guide contains practice tests and not “retired” forms of the test, there are no norms associated with these forms and calculations of scaled scores or specific percentile rankings are not possible, but the following charts will give you a good estimate of where your scores would fall. These tests are intended to familiarize you with the format, content, and timing of the test and to approximate a potential percentile rank based on a large pool of past test takers.

Table: Upper Level Estimated SSAT Percentiles

Raw Score	Verbal Percentile	Quantitative Percentile	Reading Percentile
60	99		
55	99		
50	97	99	
45	93	93	
40	85	80	99
35	75	65	96
30	62	50	82
25	47	36	63
20	31	23	43
15	18	13	24
10	8	6	11
5	2	2	3
0	1	1	1
-5	1	1	1
-10 and lower	1	1	1
